

# PLANTING

## RECURRENTLY-FLOWERING PERENNIALS

**1** Set out the plants as required, leaving them enough room to grow.

**2** Dig a hole for the plant.

**3** Immerse the 1" plant's rootball thoroughly.

**4** Remove the pot from the rootball.

**5** Place the plant in the hole that you have dug.

**6** Press down the soil around the plant.

**7** Repeat steps 2 to 6 with the other plants.

**8** Regularly water the new plants.
