

PRUNING (MAY-JUNE)

BUXUS (BALL SHAPE)

1 The buxus ball has grown considerably and urgently needs to be tidied up.

2 Place the pot at a good working height.

3 Prune with hedge shears.

4 Start at the bottom of the shape.

5 Turn the shears over, to follow the ball shape carefully.

6 Follow and trim with the shape of the ball.

7 Trim the top last.

8 The result is a tight ball shape.
