

PRUNING (MAY-JUNE)

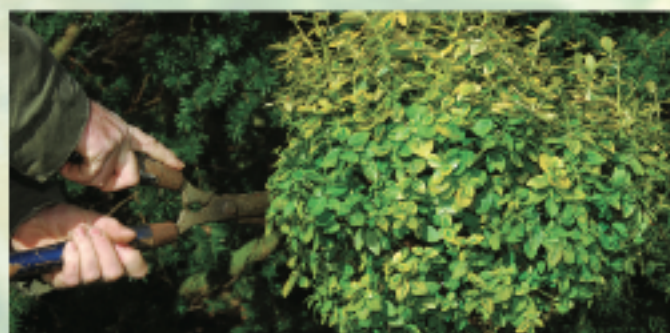

EUONYMUS (VARIEGATED STANDARD)

1 To many shoots make the plant look untidy.

2 Prune with hedge shears.

3 Turn the shears over to follow the ball shape carefully.

4 The young shoots are cut off.

5 Start at the bottom of the shape.

6 Follow and trim with the shape of the ball.

7 Trim the top last.

8 The result is a tight ball shape.
